MDD07 – Visit Aalborg

Mobile Developer Days will take place from Thursday 30th to Sunday 2nd September 2007 at Aalborg University Denmark. The main idea is to create a platform where developers, network operators, service providers, and mobile manufactures can exchange their ideas and visions in the field of mobile communication.

Aalborg University invites voluntary and professional software developers to a four days gathering. This provides an opportunity for developers, contributors and other interested people to meet in person and work together more closely. Everybody working on Linux, Symbian, and Windows Mobile platforms for mobile devices is invited. Main focus is on sharing code and experiences when making applications for mobile devices using C++, Python, Java, Open C and others. This is the first time the “mobile developer days” event takes place but it is planned as an annual event.

There will be several main tracks including developer labs, BoF sessions, tutorials, demonstrations and talks. Lecture like presentation of new technologies as well as group work with dedicated topics are the heart of this event. Researchers are invited to submit their proposal for any technical session or talks until 1st of May 2007. Potential topics are (not excluding):

- *User Interface Design*
- *Multimedia Applications*
- *Multi Player Games*
- *Energy efficient protocol design*
- *Convergence with sensor networks*
- *Peer2Peer Networks*
- *Software Defined Radio*

The call for papers, demonstrations and tutorials as well as registration and accommodation information are given at our web site.

Important dates:

April 1st

Early bird registration 110€

May 1st

Submission of technical talks

June 1st

Notification of talks and
Normal registration 160€

August 30th – September 2nd
